Proper Push Brooming Oil Dry Absorbent & Floor Sweeping Compound

A) Oil Dry Absorbent

1. Locate area of the oil spill which needs to be absorbed. Put out **Yellow Caution Floor Signs**.
2. Sprinkle down enough Oil Dry with **sifting container** to absorb the spills.
3. Let the **Oil Dry Absorbent** work until all excess oil is absorbed.
4. Sweep **Oil Dry Absorbent** into a pile using a **Superchief or Regency** broom and pickup using **Dust Pan** and **Counter Brush** and dispose of it into a **Brute Trash Container**.
5. Repeat until all oil has been absorbed by the **Oil Dry Absorbent**.
6. Remove **Yellow Caution Floor Signs**.

B) Sweeping Compound

1. Determine floor area to be swept, put out **Yellow Caution Floor Signs**.
2. Sprinkle down “a line” of **Floor Sweeping Compound** across it with a **sifting container**. Do not cover entire floor
3. Using the proper **push broom** sweep “the line” of sweeping compound through the area to be cleaned. NOTE: if you are sweeping a large area you may need to pick up dirty sweeping compound and add fresh compound. When sweeping compound becomes dark brown, it's time to use fresh sweeping compound.
4. After entire floor area has been swept with proper push broom, push dirty sweeping compound into a pile and sweep it up using the **dust pan** and a **counter top brush**. Dispose of in a **Brute Trash Container**.
5. Remove **Yellow Caution Floor Signs**.

NOTE: Be sure to store Oil Dry Absorbent and the Floor Sweeping Compound in an area that is not subject to excess moisture or spills as these conditions will cause the products to become ineffective. Keep all containers tightly sealed when not in use to avoid drying out of the Floor Sweeping Compound and Oil Dry Absorbent.

Turn Sheet Over for “Did You Remember” Items

Did You Remember?

- Superchief or Regency Push Broom (18", 24" or 36")**
- Five Foot Metal Tip Handle**
- Emtite Handle Brace**
