Proper Method for Spin Bonnet Carpet Cleaning

IMPORTANT: This method is for touch up carpet cleaning only. It does NOT replace regular heavy carpet extraction cleaning.

1. Check power cords for cracks. Make sure the plug has 3 prongs on both the Rotary floor machine and Upright Vacuum cleaner.
2. Place **Yellow Wet Floor Signs** out near carpet area to be cleaned.
3. Remove furniture from area and vacuum carpet areas to be cleaned using a **Upright Vacuum Cleaner**.
4. Mix Pre spray and Spin Bonnet cleaning solution. Use **Needels Pretreat** at a rate of 5 parts water to 1 part **Needels Pretreat** in a **14 qt Plastic Brute Bucket**.
5. Fill **sprayer** with the cleaning solution. Pump up air pressure to operate. Adjust spray nozzle to “Fan” pattern. Pre spray all carpet areas at a rate of 250 sq. ft per gallon of cleaning solution (10ft X 25ft). Pre spray should have “dew” like appearance on carpets. **DO NOT OVER WET** the carpets. Pay special attention to heavily soiled traffic lanes and spots. Allow solution to dwell on carpets for 10 minutes before bonneting.
6. Mix additional solution as outlined in #4 above. Soak the **Carpet Cleaning Bonnets** in the solution. Wring out excessive cleaning solution with clean **Wet Mop Wringer**.
7. Place carpet-cleaning bonnet to floor side of **175-RPM Floor Machine** equipped with a **Floor Pad Holder**.
8. Begin to bonnet clean the carpet in a pattern that will overlap each pass and cover the area three times. Check the carpet bonnet frequently for soil pickup. Turn the bonnet over once during use. When both sides are soiled, get a new bonnet as described in #6 and continue cleaning. You should have enough carpet bonnets to do the entire carpet area.
9. When finished use **18” Carpet Pile Brush with Handle** to brush carpet pile in one direction and remove carpet bonnet swirl marks. Replace furniture in proper places putting waxed paper squares under each furniture leg until carpet is completely dry. For faster carpet drying time use a **Rapid Air Carpet Blower**.
10. Remove **Yellow Wet Floor Signs** from the carpeted area after carpet is completely dry.
11. After completion of spin bonnet cleaning of carpets make sure to rinse all carpet bonnets, mop buckets, mop wringers with clean **cold** water. Hang up carpet bonnets to air dry so ready for next use.

Turn this sheet over for “Did you remember list”

“Did You Remember Items”

- 175 RPM Rotary Floor Machine
- Floor Pad Holder
- Carpet Cleaning Bonnets
- Needels Pretreat
- Upright Vacuum Cleaner
- 2 Gal Pump Up Sprayer
- Clean Wet Mop Bucket
- Clean Wet Mop Wringer
- Rapid Air Carpet Blower
- Yellow Wet Floor/Caution Signs
- 2qt Pump up Sprayer
- 18” Carpet Pile Brush/Handle
- Waxed Paper (cut into 4 inch squares)
- 14 Quart Plastic Brute Bucket
