Wet & Damp Mopping Procedure

Wet Mopping

- 1) Put up **Yellow Wet Floor Signs** in the area which you are to clean.
- 2) Dust mop entire floor area including all corners and edges. Remove all “Stuck On” items such as gum, from the floor using **Short Handle Utility Scraper**.
- 3) Fill the **Wet mop bucket** with desired amount of warm water. Add one ounce of **Bulldog Floor Detergent** to each gallon of water using a **One-Ounce Pump** to measure properly.
- 4) Submerge **Mop Head** into cleaning solution, then lift the mop out of the Mop bucket without wringing the mop head out, then apply directly to the floor in figure eight pattern. Continue this until you have covered entire area to clean. If large area, do sections at a time to avoid the floor drying.
- 5) After cleaning solution has been on the floor for 5 minutes, wring out the mop head completely and re-mop the floor in a figure eight pattern to pick up the cleaning solution. When the mop head becomes saturated wring it out using the **Mop Wringer** and continue mopping until all excess solution has been removed from the floor.
- 6) Remove **Yellow Wet Floor Signs** after floor completely dries.
- 7) Rinse out mop head in a sink or wet mop bucket with clean warm water and 1 ounce of **Bulldog Floor Detergent** until all dirt is removed. Hang up wet mop head and handle on **Wall Handle Holder**. Empty and thoroughly rinse out mop bucket and wringer so it is clean for the next use. Do not store mop bucket with water in it.

Damp Mopping

- 1) Put up **Yellow Wet Floor Signs** in the area to be cleaned
- 2) Dust mop entire floor area to be damp mopped, including all corners and edges.
- 3) Fill **Wet Mop Bucket** with desired amount of **warm** water. Add one ounce of **Bulldog Floor Detergent** per gallon of water in the mop bucket, using **One-ounce pump** to measure properly.
- 4) Submerge mop head into cleaning solution and wring out the mop head completely using the **Mop Wringer**. Pull the mop head out of the wringer and start mopping the floor in a figure eight pattern. Continue until the entire area to be cleaned has been completed. When cleaning solution has no foam, dispose of and get new mop bucket of cleaning solution.
- 5) Remove **Yellow Wet Floor Signs** after floor completely dries.
- 6) Rinse out **mop head** in sink or mop bucket with clean **warm** water and **1 ounce of Bulldog Floor Detergent** until all dirt is removed. Hang up wet mop head and Handle on **Wall Handle Holder** to dry. Empty and rinse out mop bucket and wringer so it is clean for the next use. Do not store mop bucket with water in it.
